

Vennekens Koral 46 for sale

The 1992 **Vennekens Koral 46** is a substantial 14.1-metre cruising yacht from Belgian builder Vennekens, a yard known for producing sturdy, low-volume cruising boats. Designed as a capable **long-distance cruiser**, this yacht combines generous tankage and practical equipment with the comfort and independence expected of a larger offshore yacht.

She is powered by a **Ford Lehmann SP90 66.24 kW** diesel and carries **1000 litres of diesel** and **1000 litres of fresh water**, supported by **two solar panels** and a **4 kW generator**.

The boat is equipped with **dual hydraulic steering, autopilot**, **bow thruster**, **radar**, two radios and **electric furling for both the headsail and mainsai**l.

For cruising and extended stays aboard, the yacht is equipped with a hot-water system, electric headsail and mainsail furlers, anchor **windlass with a new motor and Rocna ancho**r, and a selection of mainsail, headsail and staysail.

The inventory also includes a **tender with a 6 hp Yamaha outboard**, a 6-person **liferaft**, and miscellaneous onboard equipment. One electric winch is currently non-functional and the liferaft is due for servicing.

The Koral 46 is a relatively uncommon model, with specialist sailing references describing it as a low-volume, robust cruising yacht rather than a mass-produced series boat.

Overall, with her substantial tankage, generator, solar capacity, hydraulic steering, bow thruster and furling systems, she offers a well-equipped platform for comfortable coastal cruising and longer offshore passages.

Location: Preveza, Greece
