

2009 Jeanneau Sun Odyssey 50 DS for sale

We offer a 2009 Jeanneau Sun Odyssey 50 DS for sale. You can't pass by without glancing at this boat because it catches your attention with its gorgeous lines.

There are several hatches and large windows in the salon, that provide a lot of light and a charming atmosphere.

The boat is under 15 meters so it can be navigated without a D5L (coastal skipper). It is ship-registered, which gives the opportunity of financing with a mortgage on a boat the same as for a house.

The Sun Odyssey 50 DS was launched in 2008. Philippe Briand designed her high-performance hull, while the Garroni designers gave her an elegant style. Together they have created the ideal sailboat to meet all your expectations: flowing lines, design and construction certified by Bureau Veritas, a streamlined keel, and appendage for outstanding performance at sea, and the cozy, modern interior of a new generation of Sun Odyssey. You will enjoy the easy handling of this large sailboat that is perfect for long-distance cruising. The three-part cockpit has two helm positions, a cockpit with comfortable seating benches for hanging out around

a large cockpit table, and an additional rest area to relax while underway. Large winches and a powerful electric windlass facilitate handling.

Boarding is easy for everyone. You will find an opening in the row on both sides or via the boat's bathing stairs aft. This boat has wide dollies and a large deck area that facilitates movement between the driver's position and the foredeck. The boat can also easily be sailed single-handed if you wish. Here is a smart and spacious cockpit solution with good work space and room for many. A great teak table with two large flaps makes it possible for coziness and pleasant dining experiences. The two driving positions have leather-covered steering wheels. From the skipper's point of view, he gets full control over the entire boat's patio and a good overview of the navigation equipment.

Full standing height. The DS models are very spacious thanks to the deck house solution. The salon is raised so that you have an unobstructed view through the large window surfaces. This gives a feeling of belonging to the elements even if you are sitting inside the boat. The galley is large, inclusive with a good view of the salon, out to sea, and the crew in the cockpit.

This 4/3 cabin with 3 bathrooms version is very spacious and has good ceiling height. It has more space than you would naturally expect from boats in this class. No matter where you move, you don't experience tight zones. The salon, cockpit, cabins, galley, and bathroom are of a size you recognize from boats in the 60-foot class. The designers have done a fabulous job here. The deck saloon has a raised door, which gives good stowage space underneath and with its raised saloon roof this gives a very bright and pleasant atmosphere. In the bow, there are two double cabins with separate bathrooms, here the partition can be removed to make room for a kingsize berth, two double cabins aft, port cabin with direct access to the bathroom. The Sun Odyssey 50 DS is a boat that suits everyone, whether you have small children, are retired, going on a trip with friends, a long trip, or if you want a houseboat.

Sea features:

The boat is class A for good seaworthiness and is designed to be able to cross all seas. She has been built to withstand the stresses the hull and rigging get during such crossings, so you can feel safe here. The boat is easy to sail, elegant, and smooth in the sea. The boat is a very elegant and seaworthy family sailboat. She is now ready for new owners.

Engine and equipment:

With its Yanmar 4JH4-HTE with 110 hp, there is plenty of power so that you can get ahead even with strong seas and headwinds. Engine hours are 4,282, the last service was done in December 2020 and new gear was fitted in 2018. She got new sails in 2016.

For full equipment, see below.

The boat is located at Leangbukta and is ready for display and takeover.
