

2017 Bavaria Cruiser 51 for sale in Greece

The Bavaria Cruiser 51 (2017 model) is a spacious, performance-oriented sailing yacht equipped with modern features for comfortable cruising. It has a large capacity, with 5 cabins and 10 berths, plus a saloon that can convert into an additional double bed, making it ideal for family or group adventures. The 3 heads plus a separate shower provide ample privacy and convenience.

This yacht is designed for stability and comfort at sea. Its furling mainsail and furling genoa (both from 2017) ensure easy handling and maneuverability.

For power, it's fitted with a Volvo 75hp engine with 2,651 hours (as of November 2024), supported by a bow thruster for precise control in tight spaces. Solar panels (2 x 150W) are installed, adding extra power sustainability during extended journeys.

Onboard instruments include Garmin navigation systems: dual GPS-Plotters (one in the cockpit and one inside), an autopilot, and VHF with DSC/GMDSS for enhanced communication and safety. The electric windlass (Lafrance 1500) adds convenience when anchoring.

The cockpit area is equipped with double carbon fiber steering wheels for a sporty feel, bimini, and sprayhood for sun and spray protection, a cockpit table with cushions, and an adjustable cockpit table for dining. A manual transom and bathing platform offer easy access to the water, and there's a deck shower with hot and cold water.

Additional amenities include a dinghy with a Honda 2.3 hp outboard, an inverter (1000W), USB charging ports in cabins, a Bluetooth sound system, fans in all cabins and the saloon, a microwave oven, cockpit cushions, and a full safety kit for 10 passengers.

Location: Salamina, Greece
