

Endurance 35 boat for sale

I am now selling my Endurance 35, a ketch from 1982 with Ferrocement hull due to lack of time for its maintenance.

The engine is a Perkins 50 hp diesel. Sails are available (don’t know the brand though).
The mast is made of aluminium.

Sold cheap as there is some superficial rust on the engine, some need for renovation of the tires and the equipment. The interior is in some need of renovation and an overhaul of the electricity.

I bought this boat 7 years ago with thoughts of a long sail. However, the time never existed as I live in Stockholm and the boat is in Kvicksund. So I haven’t had time to learn much about the boat and may have difficulty answering very specific questions. So better come and have a look.

The cost of the marina site is approx. 15,000 per year.

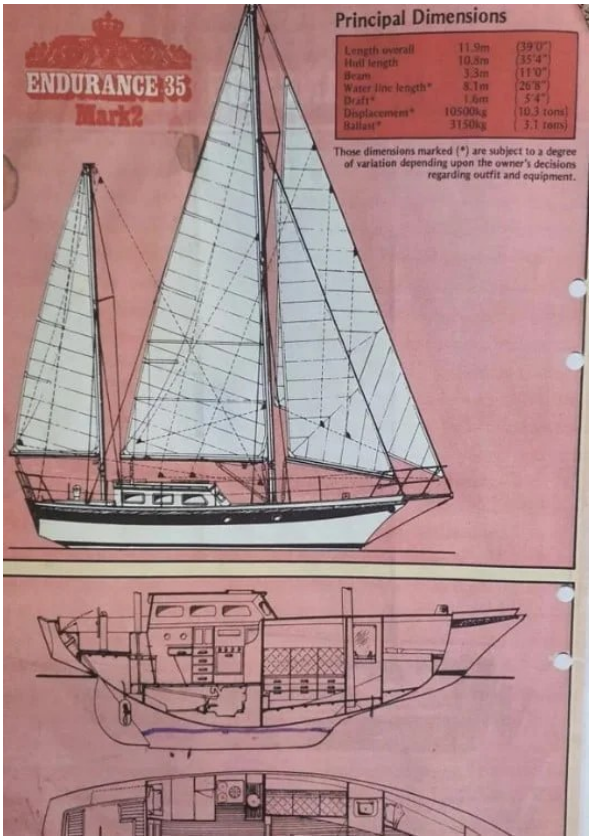

The boat is currently on land and can be sold immediately.
