

Feeling 1090 for sale in Greece

The **Feeling 1090** (1987) is a well-maintained and extensively upgraded 11.10-meter sailing yacht designed for both comfort and performance. With a generous beam of 3.56 meters and a maximum draft of 1.75 meters, she offers a stable and spacious platform for cruising.

The interior features **two comfortable cabins and a single head**, making her ideal for couples or small families.

Recent upgrades include **new rigging, seacocks**, and a comprehensive solar setup with 240W panels (2022), MPPT Victron controllers, and a smart 220V Victron battery charger, ensuring energy independence and reliability at sea.

On deck, she is equipped with a 2024 Lewmar automatic windlass, 15kg anchor, and 60 meters of new chain (30m from 2023 and 30m from 2022).

Sailing gear has been modernized with a **new jib**, furler, baby stay cable, and refreshed lines for the genoa and reefing systems. The sails are in great shape, genoa in perfect condition, mainsail in good condition, handled easily via four Harken winches, and supported by an Autohelm 4000 **autopilot**.

Powered by a Volvo Penta 2003 (29hp), she also boasts copper antifouling (2022), a fully serviced 6-person liferaft, and essential safety equipment, including new life vests and fenders.

With a bimini prepped for panel installation and a Plastimo gas kitchen setup with oven and grill, this yacht is ready for extended cruising.

> The boat is a project yacht with new standing rigging. Unfortunately, during the installation process, the fibreglass in the area at the stern where the backstay attaches cracked, and this will require repair. Additionally, the interior woodwork needs renovation due to previous water leaks. There are some issues to be addressed, but all of them have been taken into account in the asking price, making this an opportunity for someone willing to invest some work in the boat.
