

Free sailboat Rock 20

Giving away my model Rock 20 sailboat. It is a smaller sailboat from the 70s that with not too much time and energy can be made nice again and work well for those who want to make shorter trips, learn to sail, etc. but don't have high demands on comfort.

The boat includes a working outboard, sail, cradle and gas cooker, battery and many other accessories and small things that are good to have. Most of it works well, although it may not be in prime condition.

The main thing that would need to be looked at is the electricity to get all the lanterns and lights going. Then, of course, there is a lot of cleaning and polishing to do.

The boat is unmasted and lies in the water in Lagunen's marina.
