

Jeanneau Sun Fizz 40 for sale in Greece

The Jeanneau Sun Fizz 40 (1982) is a solid project boat with a strong foundation. The rigging is in good working order, and the Perkins 4108 51 HP engine has been checked, though the filters and oil will need to be changed before launching.

The hull is in good condition, free from any damage.

The interior has undergone significant restoration, including a full refurbishment of the upholstery and repairs to water and electrical systems. All bathroom systems have been serviced and are functioning well. The sails are included.

However, this boat is a project and not ready to sail immediately. While the major components like the engine and hull are sound, all ropes will need to be replaced, and navigation equipment must be purchased.

Despite these needs, the boat offers a solid starting point for a successful refurbishment and launch.

This boat has a future, but it requires a little effort and money.

The price is negotiable within reasonable limits.
