

Catamaran Voyage Norseman 430 for sale in Turkey

Description

The **Voyage NORSEMAN 43 (1999)** is a solidly built and spacious cruising catamaran, designed for bluewater passages and extended liveaboard life. Constructed with **20mm thick fiberglass** and equipped with skeg-mounted rudders, the vessel offers strong structural integrity and protection below the waterline.

It is powered by **two economical Yanmar 30 HP engines**, which received comprehensive servicing in 2024, including replacement of the saildrive gearboxes, seals, and bearings. The **antifouling was also renewed** that year, and the steering system benefits from skeg protection, offering additional durability under sail.

A custom solar arch installed in 2024 supports **four 425W panels** (1.7 kW total), feeding into a **900 Ah AGM gel battery bank** managed by dual **150/70 MPPT controllers**, enabling a high degree of off-grid capability.

A **new RIB tender with a Tohatsu outboard, gas grill**, and improved **deck lighting** add to the vessel's practicality and comfort.

Inside, the yacht features **four private cabins with en-suite heads and showers**, and a well-equipped galley with a **gas stove, oven, induction burner, two sinks, and two refrigerators**. The saloon is bright and inviting, with updated cushions and covers.

No osmosis. Moisture levels were checked professionally a week ago. No areas were found where moisture levels exceeded acceptable limits or suggested a risk of osmosis developing.

Location: Marmaris, Turkey
